DETAILED ACTION

Response to Amendment

Claims 1, 3-10 and 12 are presented in the application.

Claims 1, 6, 7, 9, and 12 have been amended.

Claims 2 and 11 have been cancelled.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding **claim 1**, in line 8, "an intermediate regeneration" – is not clear if the applicant is referring it to the intermediate regeneration disclosed in line 5 of claim 1 or it is a different intermediate regeneration. If it is a different intermediate regeneration then it is not clear which one of the intermediate regenerations (one in line 5 or one in line 8) the applicant is referring as the intermediate regeneration in line 11 of claim 1. Appropriate correction is required.

Regarding **claim 7**, in line 3, "a time" – is not clear if the applicant is referring it to the timer disclosed in line 11 of claim 1 or it is a different time which is adapted to open the valve. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, and 3-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Beck et al (WO 01/17834).

Regarding **claim 1**, Beck teaches a vehicle air supply system having a compressor (12), an air dryer (14), a reservoir (18) adapted to receive air from the compressor via the air dryer and control means (20) operable to cause standard regeneration of the air dryer when a predetermined system condition is met (abstract), the control means also being operable to cause an intermediate regeneration of the air dryer in advance of the predetermined system condition being met, wherein the control means are further operable to inhibit said intermediate regeneration. Please note that the control means (20) can allow or prevent the regeneration depending on whether the valves are open or closed.

Re-claim 6, see line (40) and the abstract.

Re-claim 3, see page 8 lines 9-15.

Re-claims 4-5, see page 2 lines 20-22.

Re-claims 7-9, see page 2 lines 26-35 and element 24.

Re-claim 10, please note that there must be some means to block the signal so as to inhibit an intermediate regeneration or there would always be intermediate regeneration in progress.

Allowable Subject Matter

Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 10/19/2007 have been fully considered but they are not persuasive.

The applicant argues in page 7 of the remarks, that the Beck reference *discloses* a vehicle air supply system and a timer to *cause* an intermediate regeneration, but *does not disclose* the use of the timer to *inhibit* an intermediate regeneration as recited in amended independent claim 1. The examiner respectfully notes that the applicant discloses a timer which is operable to cause or inhibit the intermediate regeneration in line 11 of the amended independent claim 1. The Examiner has given the broadest reasonable interpretation of the limitation "or" to mean that the timer is operable to cause the intermediate regeneration which is disclosed in the Beck reference (see page 7 of the applicant's remark filed on 10/19/2007).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
